TELL SEPTA: NO NATURAL GAS POWER PLANT!

SEPTA’S PROPOSAL:

SEPTA has proposed building a natural gas power plant in the Nicetown section of Philadelphia, to generate electricity for Regional Rail trains.

The plant would:
--Release toxic air pollution
--Harm local residents' health
--Accelerate climate change

As neighbors, riders, and employees of SEPTA, we deserve a say in this decision!

What’s the Alternative?
Across the world, transit agencies are beginning to switch to wind and solar energy. We need SEPTA to do the same.

More than 40 organizations are calling on SEPTA to say no to this plant and to plan a rapid transition to renewable energy.
